To Sky Lite Inc,

Thank you for the outstanding service and installation for the new LED lights in my store. The store looks much brighter and whiter than before. I really love how I can save money on my Con Edison electric bill as much as 20-25% through the rebate program. Thank god I got rid of the halogen and incandescent lighting which made the store less bright and didn't made me save on my electric bill. Now through the Con Edison rebate program, I can now save money and have new LED lights in my store to make everyone happy.

The vegetables and fruits look more fresh and delicious than before. After switching to the new LED lights, the vegetables and fruits last a day or two longer than before. The meat and seafood also look fresher than ever which I am very happy with. Everyone in the store such as customers and employees are happy and satisfied that the new LED lights in the store is brighter than ever before. I would really like you guys to install new LED lights in the other chain stores of Key Food to make all the stores brighter and whiter.

Thank you once again and I believe every small to large business owners should change to the new LED lights to save money on their Con Edison electric bill.

Sincerely,

A handwritten signature in blue ink, appearing to read "James Jung", written over a light blue background.
