To Sky Lite Inc,

I am very happy and satisfied with the new LED lights that were installed in my store recently. The store looks much brighter and whiter than ever before! I should have switched to LED lights way before because I love how the new LED lights are brighter and has a crisp white to it. The best part about switching to LED lights is that I get to use the Con Edison rebate program. The rebate program got me to save money on my electric bill and I only had to pay 30% for the LED lights installation.

The service and installation were great and everything was done on time! I also got to choose the time and day on when I wanted the LED lights to be installed. The LED lights were brand name products such as Phillips. Customers also look happy with the new and bright lights as the shoes looks more outstanding than ever. Our employees love the new LED lights which makes our employees happy and energized.

Thank you very much again and I would love to refer you to other small businesses to get their halogen and incandescent lights changed to new LED lights.

Sincerely,

Peter Song

President
