

# Continental Towers

02/09/2019

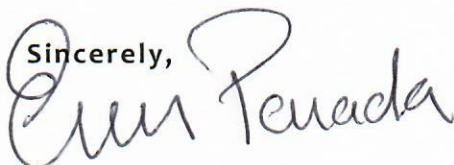

**To Sky Lite Inc,**

I am writing this letter to thank you for your outstanding work on the LED lighting project for Continental Towers. Continental Towers is a luxury Upper East Side condominium with 538 units and 36 stories and SkyLite Inc. did a tremendous job in satisfying all residents in this building, which makes me happy.

SkyLite Inc. is one of the top participating contractors with Con Edison and because of that, Con Edison contributed 53% of the total measure cost of this project; therefore, I was able to renovate all the lights for the whole building by paying what amounts to just half of the total project cost. Also, the most important part of switching to new LED lights is that of energy saving. According to the data, Continental Towers is saving almost 35% from the previous electricity bill and in an 8-month period, Continental Towers will recoup the investment cost for installing the LED lights. For these reasons, I had no hesitations to upgrade the lights to LED.

In addition, SkyLite Inc.'s LED products are not only effective in saving energy but also have an efficient design and color temperature, which in effect helps to create a warm and welcoming interior atmosphere.

Thank you once again and I would love to recommend SkyLite Inc. for LED lighting projects, especially for luxurious buildings like Continental Towers.

Sincerely,  

EVER

Assistant Manager
